German - A1

SELECTED PROJECTS

Personal Finance App

Node.js | Express.js | MongoDB | JWT | Zod | JavaScript

Collaborative full-stack application for balances, transfers, merchant payments, budgets, savings pots, recurring bills, and profile management. Includes authentication, validation, search, filtering, and responsive layouts.

EarthLens

React 19 | Vite | SCSS Modules | Framer Motion | i18next

Bilingual country discovery and travel-planning experience with 253 country profiles, live weather, comparison tools, favorites, wishlists, local persistence, and resilient data fallbacks.

Healthcare Analytics Dashboard

Power BI | Excel | Power Query | DAX

Collaborative university dashboard that turns hospital records into operational, financial, and patient-experience views across visits, revenue, debt, severity, satisfaction, follow-ups, and no-shows.

React Users App

React | React Router | Vite | JavaScript | CSS

Responsive two-page application with API-driven user cards and clear loading, error, and empty states.

CURRENT FOCUS

Deepening TypeScript, Next.js, NestJS, testing, Docker, GraphQL, AWS, and system design through structured learning and project work.

Public-safe portfolio version - private phone number and street address intentionally omitted.
